EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Winston Hsu on 8/16/2006.

2. **Claims 1 and 13** have been amended as shown in Attachment A – Claim Listings. **Claims 8-12 and 14** have been cancelled as further indicated in Attachment A – Claim Listings.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-7, 13, and 15-17 are allowable over the prior art of record since the cited references, taken individually or in combination, fail to particularly teach or suggest a method of detecting a connection polarity of a network transmission line wherein the network transmission line has a receive and transmit pair of lines and the method comprising in a predetermined interval counting a first number of signals transmitted over the transmit pair and counting a second number of signals transmitted over the receive pair and when ever the difference between the first number and second number is less than a first threshold value indicating the connection polarity of the network transmission line is correct and when ever the difference between the first number and second number is greater than a second threshold value indicating the connection polarity of the network transmission line is incorrect and consequently inverting the

polarity. It is noted that the closest prior art, US 5, 315, 597 to Yang et al (See discussion in Columns 2 and 6), discloses a method of detecting a connection polarity of a network transmission line wherein the network transmission line has a receive and transmit pair of lines and the method comprising in a predetermined interval on the receive pair of lines receiving 8 Link Integrity Test pulses with the same polarity indicates the connection polarity of the network transmission line is correct.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Habte Mered whose telephone number is 571 272 6046. The examiner can normally be reached on Monday to Friday 9:30AM to 5:00PM.
